

## **CARE OF YOUR MOUNTCASTLE HAT**

Your Mountcastle Aussie Mate hat is a quality item and with proper care during its life you can maintain its appearance and durability.

### **CARE INSTRUCTIONS FOR AUSSIE MATE & UTILITY HATS**

- **DO NOT DRY CLEAN.**
- Hand wash **ONLY**.
- Cold water **ONLY**.
- Drip-dry **ONLY**.
- **DO NOT** use any washing powders that contain built in bleach.
- **DO NOT** allow your hat to dry in the direct sunlight.
- **DO NOT** store your hat in the car.

NB: If your child perspires heavily you will notice a white substance form on the bottom of the crown and where the brim meets the crown. This substance is a build up of salt from the perspiration and if left unattended, will fade the fabric.

In this event you can rinse the hat out in cold water **ONLY** on a weekly/fortnightly basis to remove the salt build up from the fabric.
